

## GLAZING IN MODULAR PARTITIONS

With the system of partition panels, a glazed window panel represents one of the basic elements to construct clean workplaces and areas with maximum safety, sterility, hygiene, easy maintenance and sanitation.

The system in question is the PHARMA glazing system, offering double-sided glazing where the glass pane is in plane with the surface of the panel. Its design makes it suitable especially for areas in pharmaceutical industry, electrical engineering industry, mechanical engineering industry, food industry, etc.

### MORE INFORMATION, PHOTOS

### TECHNICAL DATA

#### Type

Glazing in modular partitions

## Panel width

**standard dimension 1190 mm**

atypical

Min. width 560 mm, max. dimension 1190 mm.

## Panel height

**1000 mm**

**800 mm**

atypical

Min. height 800 mm, max. dimension 1500 mm.

## Glazing

laminated safety glass, thickness 6,4 mm

**float glass, thickness 4 mm**

atypical

Note: As standard the glazing is of clear glass, but it is possible to order an atypical version with milk glass.  
Float glass design only for glazing with sill 1100mm and above.

## Frame hue and material

**metal sheet, hue RAL 9016**

Stainless steel AISI 304

metal sheet, hue RAL

## Atypical design

**Type design**

Atypical design

Type design

0 - Unique specification out of offered versions

Atypical design

Q - atypical design that cannot be uniquely specified by a code
